

Setting the Standards

ENVIRONMENTAL POLICY

Our commitment to the environment is guided by our environmental policy, developed with customer requirements and legislation in mind.

This Policy applies to all sites, personnel and operations.

Information is provided to employees on notice boards/memos and to customers when requested.

Stormking Plastics regularly reviews environmental legislation & other requirements relevant to our environmental aspects, activities, products and services, ensuring continual compliance.

Stormking Plastics exercise due care in preventing pollution and the disposal of waste produced as a result of company activities, developing plans to reduce waste, and increase efficiency. In relationships with our customers and suppliers, we are taking practical steps to prevent pollution and to reduce energy consumption and waste.

Stormking Plastics encourage re-use of material wherever feasible, when it does not compromise our product or service.

Stormking Plastics aim to protect the environment & reduce our impact on the environment and implement environmentally responsible policies/products throughout our operations. We understand the importance of integrating good environmental practices into management and strategic planning.

Stormking Plastics will continuously seek to improve our environmental performance by setting and reviewing objectives and targets.

This Environmental Policy statement is displayed on company notice boards, and a copy is given to new employees. It is reviewed annually and updated as appropriate.
